COMPREHENSIVE USER & TRAINING MANUAL

GUDI CHEMICALS ERP USER MANUAL

Complete Step-by-Step Operations Guide with Exhaustive Billing Masterclass

System:	Gudi Chemicals ERP (Release 1.0)	Prepared By:	ARUN CODEX
Document Type:	Official User Manual & Training Guide	Author Role:	Web Developer Designer Innovator
Target Audience:	Cashiers, Billing Clerks, Managers, Chemists	Language:	Simple, Lucid & Practical English
Core Focus:	High-Speed POS & Invoicing Masterclass	Publication Date:	October 2026

Welcome to Gudi Chemicals ERP

Welcome to the official **Gudi Chemicals ERP User Manual**, authored and designed by **ARUN CODEX**. This guide is written in clear, simple English to provide every team member — from counter cashiers and warehouse storekeepers to plant chemists and accountants — a clear, step-by-step walkthrough of daily operations.

Special Emphasis on Billing

Because counter checkout speed and 100% tax accuracy are vital to daily commercial success, **Chapter 2** is dedicated entirely to the **Billing & POS Module**. It covers barcode scanning, Retail vs Wholesale pricing, split payments, printing thermal slips vs standard A4 tax invoices, and processing returns.

Chapter 1: Getting Started & Navigation

1.1 Logging In to the ERP

STEP 1: OPEN YOUR BROWSER

Launch Google Chrome, Microsoft Edge, or Mozilla Firefox. Navigate to your local server address (e.g., `http://127.0.0.1:8000/login` or your plant's internal IP address).

STEP 2: ENTER YOUR CREDENTIALS

Enter your assigned corporate email address and password. For default testing or administrator access:

- **Admin Email:** `admin@gudichemicals.com` (Password: `Admin@12345`)
- **Cashier Email:** `cashier@gudichemicals.com` (Password: `Cashier@12345`)

STEP 3: CLICK "SIGN IN TO ERP"

You will be securely authenticated and redirected immediately to your role-based dashboard.

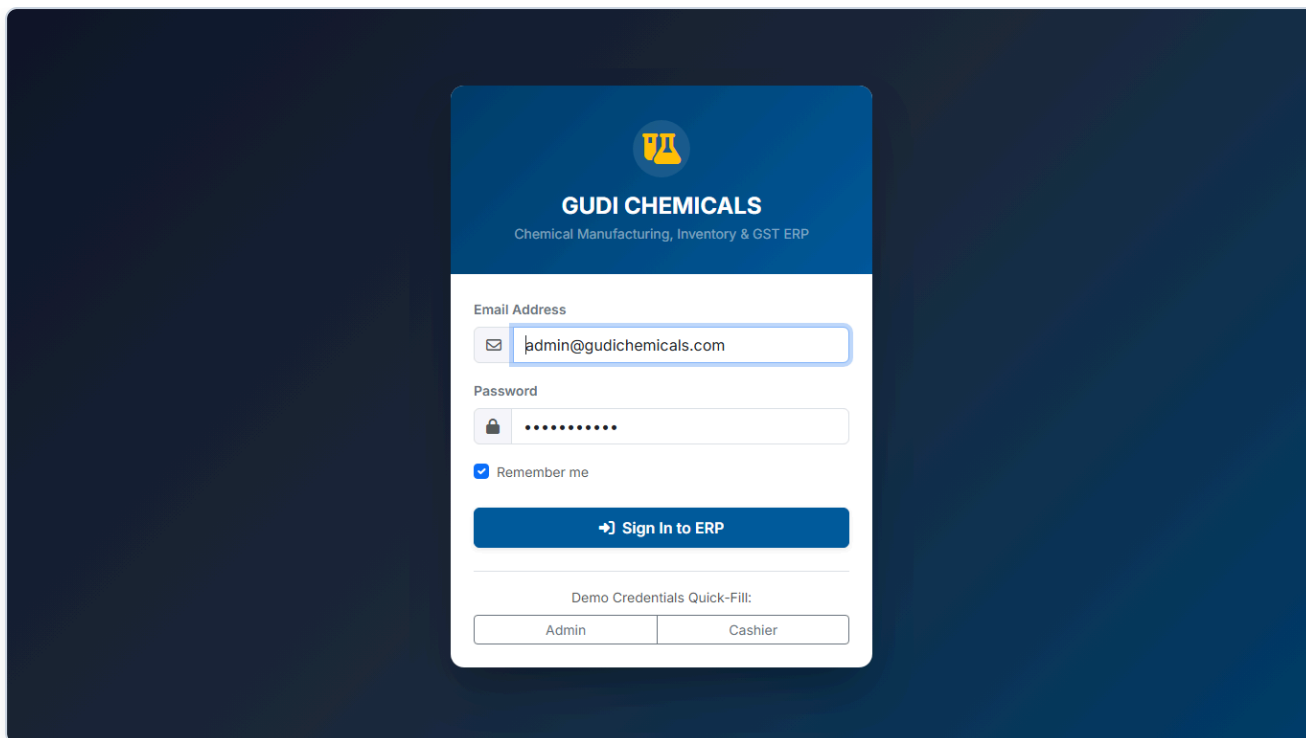

Figure 1.1: Gudi Chemicals ERP Secure Login Screen with Branding and Role Access

1.2 Understanding the Dashboard

The Executive Dashboard displays a real-time operational pulse of your chemical enterprise:

- **Today's Sales Revenue:** Real-time counter collections and wholesale dispatch billings.
- **Active Batches in Production:** Live count of chemical vats currently being mixed or pending QC release.
- **Low Stock Alerts:** Instant warning cards alerting storekeepers to reorder raw chemicals or plastic containers before stocks deplete.
- **Quick Action Shortcuts:** One-click navigation to Open POS Desk, Create Production Order, or Record New Purchase.

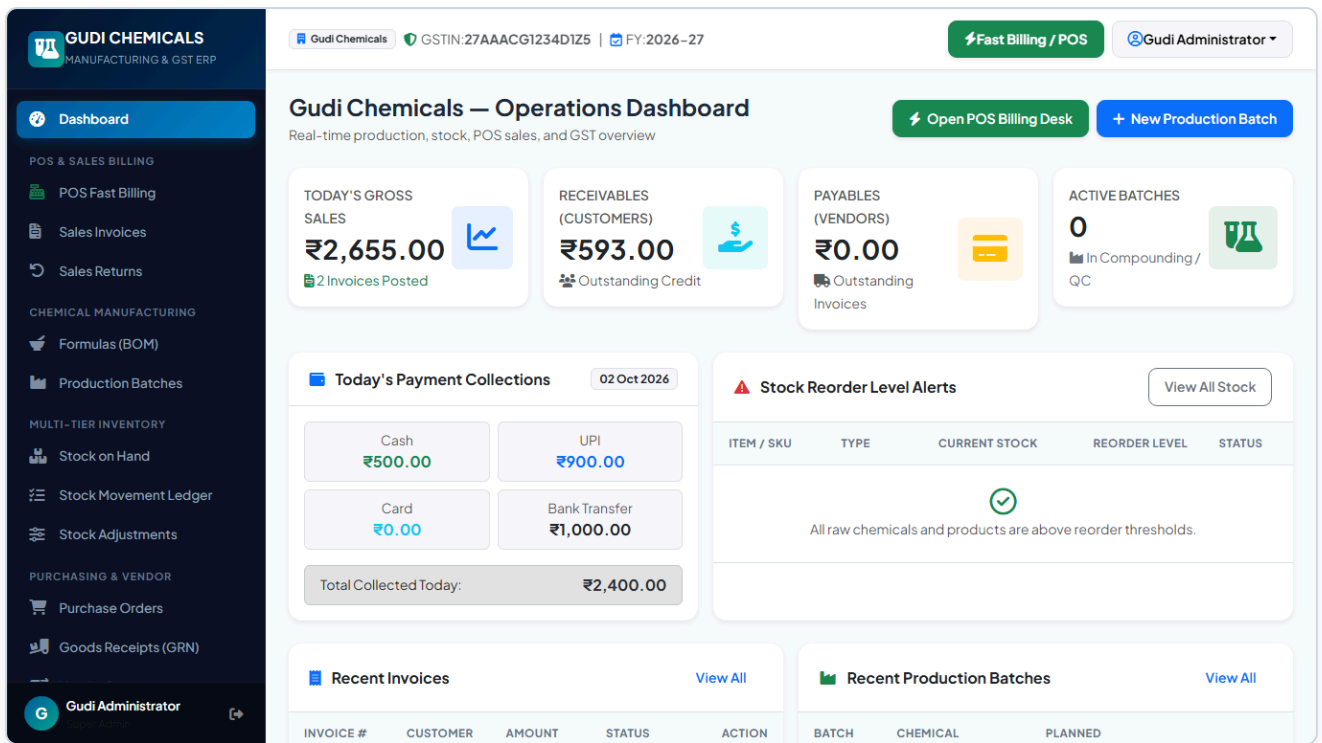

Figure 1.2: Central Operational Dashboard with Financial, Stock, and Production Metrics

Chapter 2: High-Speed POS & Billing Masterclass PRIMARY CORE MODULE

The Billing Desk is where customers are served and revenue is recorded. Gudi Chemicals ERP provides a blazing-fast, single-screen Point of Sale interface designed to handle long customer queues effortlessly.

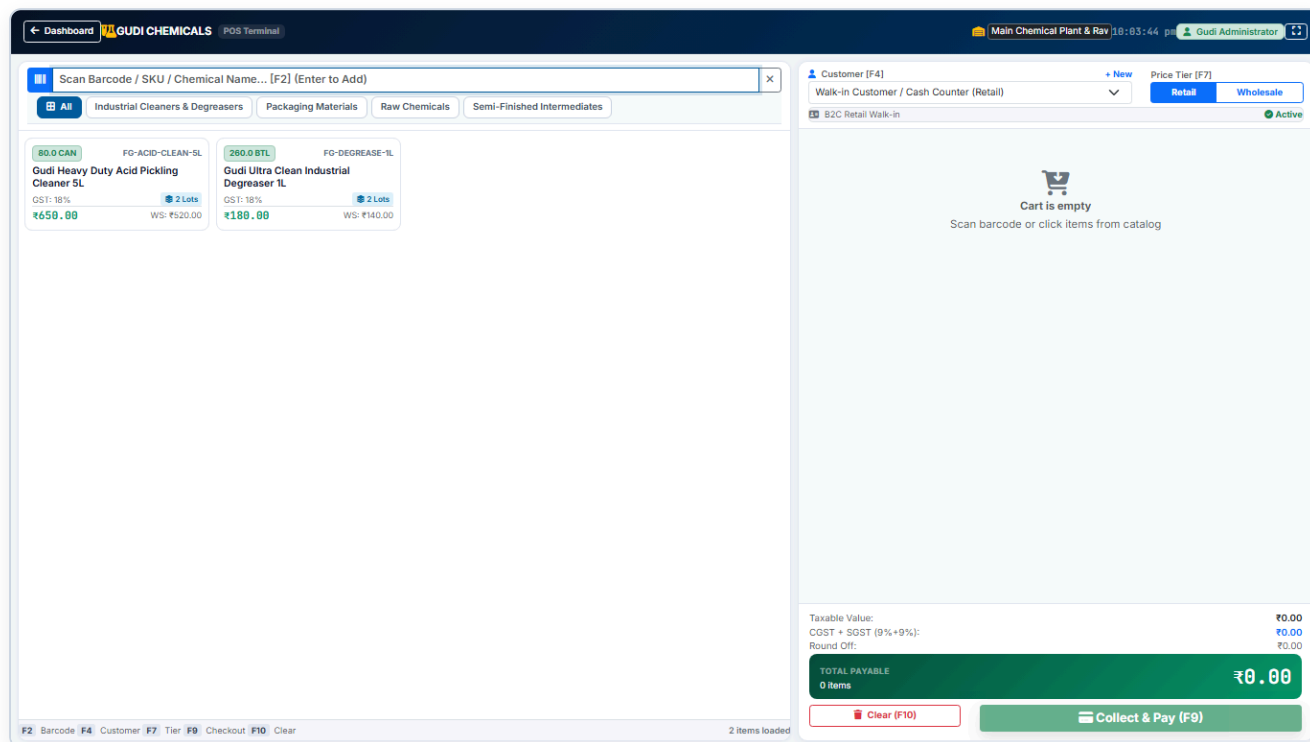

Figure 2.1: The POS Fast Billing Screen — Product Grid (Left) and Active Cart & Summary (Right)

2.1 Anatomy of the Billing Screen

The billing desk is divided into intuitive, high-visibility sections:

1. **Top Control Bar:** Displays active Warehouse location selector, Customer selector dropdown, Quick Add Customer button (+), and Price Tier toggle (Retail / Wholesale).
2. **Product Search & Barcode Input:** Search box with keyboard shortcut **F2**. Instantly searches across 4,000+ chemical items or accepts hardware barcode scanner scans.
3. **Product Catalog Grid:** Visual grid showing fast-moving packaged chemicals with real-time stock badges and quick-add buttons.
4. **Active Order Cart:** Displays added line items, unit prices, quantity modifiers (+/-), discount boxes, HSN codes, and line totals.
5. **Real-Time Tax & Total Box:** Displays Subtotal, Discount, Taxable Value, CGST/SGST (Intra-state) or IGST (Inter-state), Round-off amount, and Grand Total.
6. **Action Buttons:** Clear Cart (**Esc**) and **Pay & Generate Invoice (F8)**.

2.2 Keyboard Shortcuts for Ultra-Fast Billing

Keyboard Key	Action	How to Use in Real Counter Work
F2 or Ctrl + K	Search Item	Press to immediately focus cursor into the product search bar without touching the mouse.
F4	Select Customer	Press to open the customer dropdown to switch from Walk-in to a B2B client.
F7	Toggle Price Tier	Press to toggle between Retail Selling Price (RSP) and Wholesale Selling Price (WSP).
F8	Checkout / Pay	Press to open the payment modal to collect cash, UPI, or card.
Esc	Close / Clear	Press to dismiss open payment dialogs or clear the active search filter.

2.3 Walk-in Retail Billing (Step-by-Step)

STEP 1: SELECT OR SCAN PRODUCTS

- Point your USB barcode scanner at the product container barcode (e.g., Industrial Degreaser 1L bottle). The item immediately jumps into the cart with quantity 1.
- Alternatively, press **F2** and type the first 3 letters of the product (e.g., deg), then click the product card or press Enter.

STEP 2: ADJUST QUANTITY

Use the + or - buttons in the cart row, or click directly into the quantity box to type a number (e.g., 5). The server immediately updates the line subtotal and tax amounts.

STEP 3: REVIEW CUSTOMER & PRICE TIER

For regular counter retail sales, leave the customer as **"Walk-in Customer"** and the tier as **"Retail"**.

STEP 4: PRESS F8 (PAY & CHECKOUT)

The payment modal appears. If the customer hands you ₹1,000 cash for an ₹885 bill:

- Enter 1000 in the Cash Tendered box.
- The screen displays: **Change Due: ₹115.00**.

STEP 5: CLICK "COMPLETE & PRINT INVOICE"

The transaction is committed atomically. Physical inventory is deducted immediately, and the thermal receipt or A4 tax invoice prints automatically!

2.4 B2B Wholesale Billing (Step-by-Step)

When billing corporate clients, chemical factories, or regional distributors, follow this professional workflow:

STEP 1: SELECT THE REGISTERED B2B CUSTOMER

Press **F4** and select the customer (e.g., *Apex Chemical Industries Ltd*). The system automatically displays their registered GSTIN, State Code, and available Credit Limit.

STEP 2: AUTOMATIC WHOLESALE PRICING (WSP)

The system automatically switches the price tier to **Wholesale (WSP)**. Notice that unit prices adjust to discounted bulk wholesale rates!

STEP 3: ADD BULK PACKAGING ITEMS

Select 20L Jerry Cans or 200L Drums. Add the requested drum quantities (e.g., 10 Drums).

STEP 4: MULTI-MODE SPLIT PAYMENT OR ACCOUNT CREDIT

In the payment modal (**F8**), you can split the settlement:

- **Bank Transfer / NEFT:** Enter ₹50,000 against company bank account.
- **Customer Credit:** Post the remaining balance (e.g., ₹25,000) to their ledger (Net 30 Days payment terms).

2.5 Understanding GST on Your Invoices (Simple English)

Indian GST operates under two simple location rules that Gudi Chemicals ERP calculates automatically:

Where is Customer Located?	Tax Category Applied	How It Is Split & Shown on Invoice
Within Maharashtra (Customer State Code 27)	Intra-State GST (CGST + SGST)	If item tax rate is 18%, it splits exactly in half: • 9% Central GST (CGST) • 9% State GST (SGST) • Integrated GST (IGST) is ₹0.00.
Outside Maharashtra (e.g., Gujarat - Code 24, Karnataka - Code 29)	Inter-State GST (IGST)	The full tax is assigned to Integrated GST (IGST) : • 18% IGST • CGST and SGST are ₹0.00.

2.6 Dual Print Formats: Thermal vs A4 Tax Invoice

Depending on customer requirements, choose the right format from the Invoices screen:

- **Thermal Slip (80mm):** Click "Print Thermal". Ideal for cash sales, small vans, and retail customers. Quick, uses zero ink, and saves paper!
- **Standard A4 GST Tax Invoice:** Click "Print A4". Essential for commercial transport vehicles, B2B tax credit input (ITC), and corporate accounts. Includes full seller/buyer GSTIN addresses, HSN tax summary, bank RTGS details, and authorized signature.

Chapter 3: Master Data Operations

3.1 Adding a New Chemical Product

To register a new raw chemical, packaging item, or finished bottled product:

1. Go to **Masters** → **Products** in the left sidebar. Click **" + Add New Product "**.
2. **Item Details:** Enter Item Name (e.g., *Industrial Heavy-Duty Degreaser*), SKU (e.g., FG-DEGREASE-5L), and Barcode.
3. **Item Classification:** Select whether it is *raw_material*, *semi_finished*, *finished_goods*, or *packaging*.
4. **Pricing Tiers:**
 - **Cost Price (₹):** Factory manufacturing cost or purchase price.
 - **Retail Price (₹):** Selling price for walk-in retail counter buyers.
 - **Wholesale Price (₹):** Discounted bulk price for B2B distributors.
 - **Min Selling Price (₹):** Safety price floor below which no cashier can sell.
5. **Tax & HSN:** Enter the 4-digit or 8-digit HSN code (e.g., 3402) and GST rate (18%).
6. Click **"Save Product"**. The item is instantly available in the POS billing catalog!

PRODUCT & SKU	TYPE	CATEGORY	HSN & GST	COST PRICE	RETAIL PRICE	WHOLESALE	AVAILABLE STOCK	STATUS	ACTIONS
1 Litre HDPE Chemical Bottle with Cap & Induction Seal SKU: PKG-BTL-1L Barcode: 890100200001	Packaging	Packaging Materials	3923 18% GST	₹11.50	-	-	0.00 NOS	Active	Edit

Figure 3.1: Products Master Catalog with SKU, Category, Dual Pricing, and Stock Status

Chapter 4: Inventory & Warehouse Management

4.1 Entering Opening Stock

When starting operations or conducting initial stock audits, record opening balances via **Inventory** → **Opening Stock**. Specify the product, warehouse location, quantity, unit cost, and lot number.

4.2 Reading the Stock Ledger & Traceability

Under **Inventory** → **Stock Ledger**, every transaction is audited. You can see precisely who deducted or added stock, the exact timestamp, the linked Invoice or GRN document number, and the resulting balance after movement.

Figure 4.1: Real-Time Multi-Tier Inventory Status and Batch Valuation Screen

Chapter 5: Chemical Manufacturing & BOM Guide

5.1 Creating a Bill of Materials (Master Formula)

A Bill of Materials (BOM) is your chemical recipe. Navigate to **Production** → **Formulas** → **Create**:

1. **Header:** Give the recipe a name (e.g., *Standard Alkaline Cleaner v1*) and base output batch size (e.g., 1,000 Liters).
2. **Expected Yield & Process Loss:** Enter standard yield (e.g., 98%) and allowed evaporation loss (2%).
3. **Add Ingredients:** Specify the exact quantity of each raw ingredient per 1,000L (e.g., 850L DM Water, 100L Caustic Soda Flakes, 50L Surfactant).
4. Click "**Save Formula**".

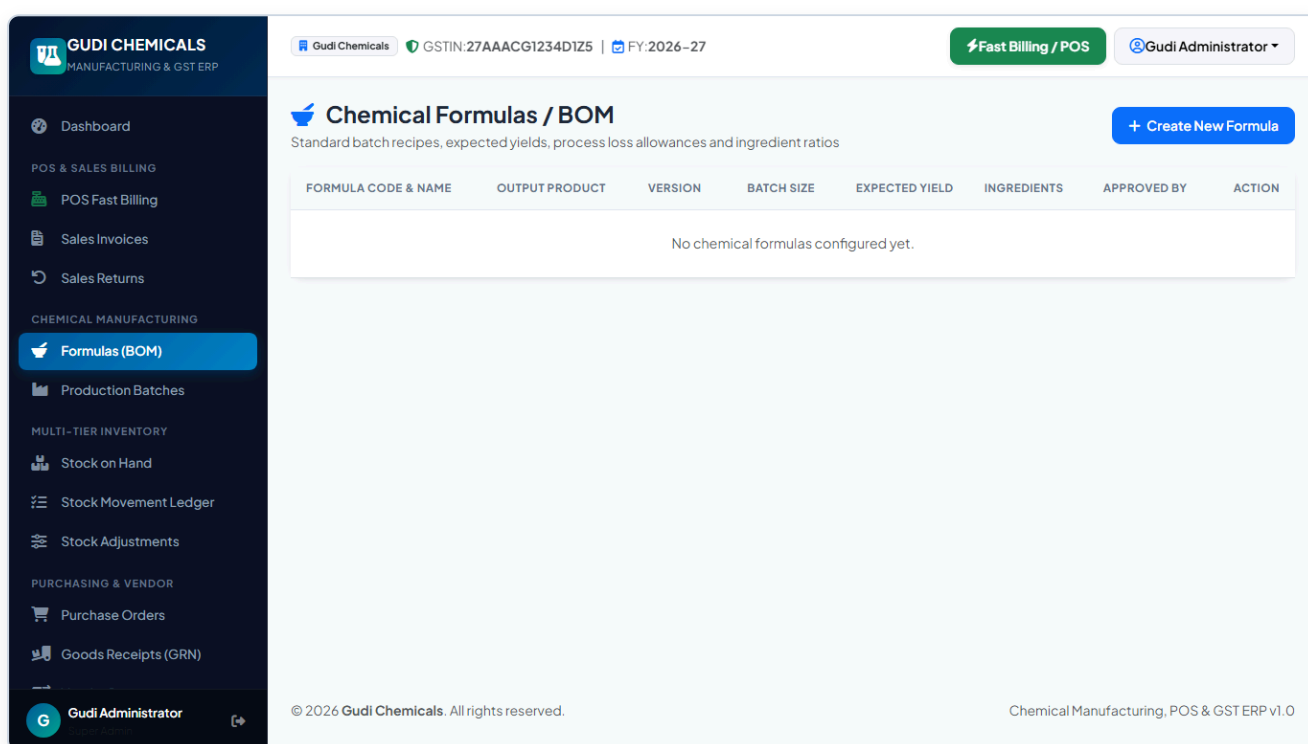

Figure 5.1: Master Chemical Recipes & Bill of Materials (BOM) Management

5.2 Running a Production Order & Quality Control (QC)

STEP 1: CREATE PRODUCTION ORDER

Select the master formula and enter your planned batch output (e.g., 2,500 Liters). The system automatically multiplies ingredient requirements by 2.5!

STEP 2: MIXING & IN-PROCESS STATE

Mark order as "In Production". Operators consume raw ingredients from active warehouse lots.

STEP 3: LABORATORY QUALITY CONTROL (QC)

Plant chemist enters laboratory test measurements: pH level, Specific Gravity, and Viscosity. If parameters pass, mark status as "QC Passed".

STEP 4: FINALIZE BATCH

Click **"Finalize Production Order"**. In one single click, raw chemical stock is deducted, finished chemical inventory is credited, and cost per liter is recorded!

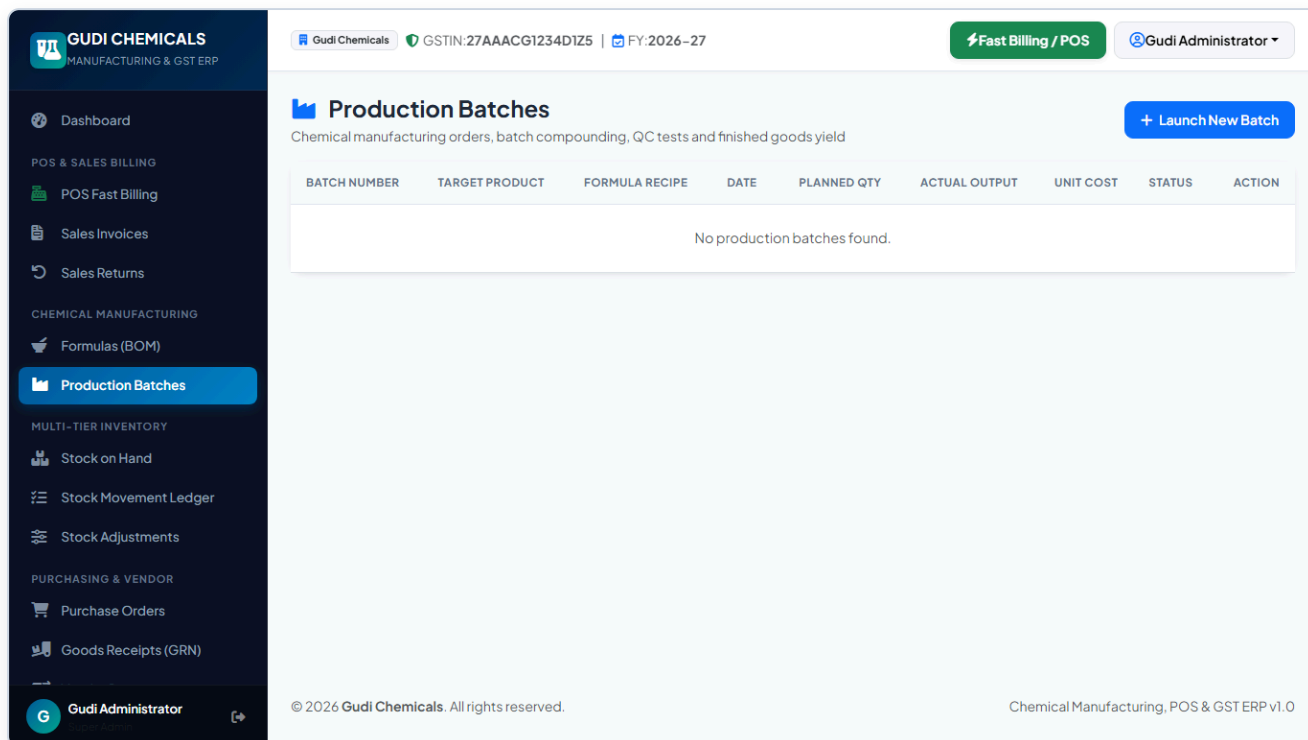

Figure 5.2: Production Orders Desk showing Batch Lifecycle and QC Verification

Chapter 6: Purchasing & Goods Receipt (GRN)

When raw chemicals arrive at the plant gate:

1. Navigate to **Purchases** → **Goods Receipt (GRN)** → **Create**.
2. Select the Vendor and reference Purchase Order.
3. Enter received quantities, supplier lot number, manufacturing date, and expiry date.
4. Click **"Post Goods Receipt"**. Stock increments immediately in warehouse inventory!

Chapter 10: Troubleshooting & Quick FAQ

Issue Encountered	Probable Cause	How to Resolve
"Insufficient Stock" error when adding to cart	Available warehouse quantity is lower than cart requested units.	Check stock balance under Inventory. Perform a GRN or production finalization to increase sellable stock.
Barcode scanner does not add item	Scanner USB cable loose or barcode not registered in Product Master.	Test scanner in Notepad. If code types properly, ensure the barcode is linked to the product under Masters → Products.
Thermal slip prints blank or illegible	Thermal roll inserted upside down or print head dirty.	Flip paper roll so heat-sensitive coated side faces printer head. Clean head with isopropyl alcohol swab.
Wrong tax split on B2B invoice	Customer State Code is set incorrectly.	Edit customer profile under Masters → Customers. Ensure State is set to Maharashtra for CGST/SGST or other state for IGST.
