COMPREHENSIVE PAGE-BY-PAGE TRAINING MANUAL

GUDI CHEMICALS ERP USER MANUAL

Complete Step-by-Step Operations Guide Covering All Modules with Live Screen Visuals

System:	Gudi Chemicals ERP (Release 1.0)	Prepared By:	ARUN CODEX
Operating Location:	Spic, Thenkarai, Coimbatore, Tamil Nadu 641010	Author Role:	Web Developer Designer Innovator
Product Lines:	Cleaning Products: Floor, Toilet, Glass, Dish Wash, Detergent	Hours:	9:00 am – 6:30 pm (Mon – Sat)
Format:	Page-Wise Illustrated Operational Guide	Tax Jurisdiction:	Tamil Nadu (State Code: 33)

Manual Structure & Table of Contents

This User Manual is organized **page-by-page** to walk operators through every functional screen of **Gudi Chemicals ERP**. Each module includes a real application screenshot, visual element explanations, and step-by-step operating methods.

Chapter	Module & Operational Screen	Core Process Walkthrough
Ch. 1	Secure Login & Authentication	Account access, credentials input, role-based redirection, session safety.
Ch. 2	Executive Operational Dashboard	Reading KPI metric cards, tracking live sales, stock alerts, quick links.
Ch. 3	High-Speed POS Fast Billing Desk	Barcode scanning, instant SKU search, cart management, dual price tiers.
Ch. 4	POS Cash Checkout & Change Due	Cash tendered input, change due calculation, cash drawer trigger, invoice posting.
Ch. 5	Sales Invoices Register & Shift Log	Filtering invoices, reviewing payment status, reprint options, cashier shifts.
Ch. 6	Invoice Details & Action Center	Checking line item tax splits, customer information, linked stock decrements.
Ch. 7	Dual-Format Print Engine (A4 & Thermal)	Printing 80mm thermal counter slips and formal 3-copy A4 GST tax invoices.
Ch. 8	Chemical Products Master Catalog	Creating SKUs, setting Retail (RSP) & Wholesale (WSP) prices, HSN, barcodes.
Ch. 9	Multi-Tier Inventory & Stock Ledgers	Real-time warehouse balances, lot expiry, opening stock, adjustments.
Ch. 10	Chemical Formulas & Bill of Materials (BOM)	Master recipe versioning, raw chemical ratios, packaging components, yield.
Ch. 11	Production Orders & Laboratory QC Gates	Batch scheduling, ingredient consumption, pH/viscosity QC testing, finalization.
Ch. 12	Purchasing & Goods Receipt Notes (GRN)	Supplier PO generation, receiving raw chemicals, lot creation, vendor bills.
Ch. 13	Sales Returns & GST Credit Note Desk	Original invoice verification, saleable vs damaged stock segregation, refunds.
Ch. 14	Sales & Statutory GSTR-1 Analytics	Turnover reports, HSN tax summaries, date filters, Excel exports.
Ch. 15	System Settings & Company Profile	Updating business address, GSTIN, receipt footers, user permissions.
Ch. 16	Keyboard Shortcut Cheat Sheet	Function key reference card for rapid mouse-free counter billing.

Chapter 1: User Login & Session Security

The authentication portal safeguards your ERP against unauthorized access. Every employee (Cashier, Storekeeper, Chemist, Manager) is assigned a dedicated email login with strict role permissions.

Figure 1.1: Gudi Chemicals ERP Login Screen with Dark Navy Branding and Input Fields

1.1 On-Screen Elements Breakdown

- **Gudi Chemicals Header:** Displays company name and system logo.
- **Email Address Box:** Enter your registered corporate email (e.g., cashier@gudichemicals.com).
- **Password Box:** Enter your secure password (case-sensitive).
- **Remember Me Checkbox:** Keeps your session active on trusted depot workstations.
- **Sign In to ERP Button:** Submits your credentials with CSRF security protection.

1.2 Step-by-Step Operating Process

STEP 1: OPEN THE APPLICATION

Open Google Chrome or Microsoft Edge. Navigate to the local server URL (e.g. `http://127.0.0.1:8000/login`).

STEP 2: ENTER EMAIL & PASSWORD

Type your login credentials. If using the default administrative account, enter `admin@gudichemicals.com` with password `Admin@12345`.

STEP 3: CLICK "SIGN IN TO ERP"

The system validates your account and redirects you to the main Operational Dashboard.

Security Best Practice

Always log out from your shift using the top-right user menu when leaving the billing desk unattended.

Chapter 2: Executive Operational Dashboard

The Dashboard gives plant owners and shift supervisors a real-time operational bird's-eye view of counter sales, warehouse inventory levels, and commercial performance.

Figure 2.1: Executive Operational Dashboard with Real-Time Revenue, Stock Alerts & Quick Navigation

2.1 Visual Metrics & Widget Guide

- **Today's Sales Card (Green):** Displays total revenue billed across all counters for the current day.
- **Total Invoices Billed (Blue):** Displays the volume of customer transactions completed today.
- **Low Stock Alert Card (Orange/Red):** Flashes the number of chemical items currently below their reorder safety threshold.
- **Customer Receivables Card:** Shows outstanding credit ledger balances due from wholesale buyers.
- **Sales & Revenue Charts:** Interactive bar and line charts visualizing weekly sales velocity and peak counter billing hours.
- **Recent Transaction Feed:** Displays the latest 5 posted invoices with customer names, time, and amounts.

2.2 Daily Operational Routine for Store Managers

STEP 1: REVIEW LOW STOCK WARNINGS

Every morning at 9:00 am, check the Low Stock alert badge to identify which cleaning products (e.g., 5L Degreasers or 1L Bottles) need immediate warehouse replenishment.

STEP 2: LAUNCH COUNTER POS DESK

Click the "Open POS Fast Billing" shortcut button to launch the checkout terminal for cashiers.

Chapter 3: High-Speed POS Fast Billing Desk

The Point of Sale (POS) desk is engineered for rapid counter checkout. Cashiers can complete a multi-line transaction entirely through keyboard shortcuts and hardware barcode scanning.

Figure 3.1: POS Fast Billing Screen — Product Catalog Grid (Left) and Active Cart & Real-Time GST Summary (Right)

3.1 Screen Layout Breakdown

- **Top Control Bar:**
 - **Warehouse Selector:** Selects source warehouse (defaults to *Main Chemical Depot & Stores, Thenkarai*).
 - **Customer Dropdown (F4):** Chooses between Walk-in Retail Customer or registered B2B wholesale buyers.
 - **Price Tier Toggle (F7):** Switches prices dynamically between **Retail Price (RSP)** and **Wholesale Price (WSP)**.
- **Product Search Box (F2):** Instant debounced search for product SKU, name, or hardware barcode scan.
- **Product Card Grid:** Displays fast-moving bottled cleaners with current stock indicators.
- **Cart Table:** Shows selected items, unit prices, quantity buttons (+/-), discount boxes, and line totals.
- **Tax & Total Summary:** Real-time display of Subtotal, Taxable Amount, CGST (9%), SGST (9%), Round-off, and Net Grand Total.

3.2 Step-by-Step Billing Process

STEP 1: ADD PRODUCTS TO CART

- **Using Barcode Scanner:** Scan the product barcode on the bottle. The item instantly appears in the cart with quantity 1.
- **Using Keyboard:** Press **F2**, type product name (e.g., degrease), and press Enter.

STEP 2: ADJUST QUANTITIES OR APPLY DISCOUNTS

Click + or - to modify quantity. Type in a line-item discount if authorized.

STEP 3: PRESS F8 TO PROCEED TO CASH CHECKOUT

Press  (or click the green "**Pay & Checkout**" button) to open the Cash Payment modal.

Chapter 4: Cash Payment Checkout & Change Due

Under the commercial edition, the checkout desk operates on a fast, reliable **Cash-Only** settlement workflow. This eliminates electronic gateway delays and guarantees zero transaction fees.

Figure 4.1: POS Cash Payment Checkout Modal displaying Net Payable, Cash Tendered, and Automated Change Due Calculation

4.1 On-Screen Elements in Payment Dialog

- **Net Invoice Due Banner:** Displays the final bill amount in bold green currency (e.g., **₹1,062.00**).
- **Cash Tendered Input:** Field where the cashier enters the physical currency amount received from the customer.
- **Quick Cash Suggestion Chips:** Fast-click buttons for exact cash, ₹500, ₹1,000, or ₹2,000 notes.
- **Automated Change Due Display:** Instantly displays the exact change amount to return to the customer in bold numerals.
- **Complete & Print Invoice Button:** Finalizes the transaction, opens the cash drawer, and prints the tax receipt.

4.2 Step-by-Step Cash Settlement Workflow

STEP 1: VIEW THE TOTAL DUE

Tell the customer the total bill amount (e.g., "Your total is ₹1,062").

STEP 2: RECEIVE CASH & ENTER AMOUNT

Customer hands you two ₹500 notes and two ₹50 notes (₹1,100). Type 1100 in the **Cash Tendered** box.

STEP 3: VERIFY CHANGE DUE

The screen immediately calculates: **Change Due: ₹38.00**.

STEP 4: CLICK "COMPLETE & PRINT INVOICE"

Press Enter or click the button. Place the cash in the drawer, hand the ₹38 change to the customer, and hand over the printed invoice!

Chapter 5: Sales Invoices Register & History

Under **Sales** → **Invoices**, the system maintains a complete chronological ledger of every tax invoice generated at the counter or dispatched from the warehouse.

Figure 5.1: Sales Invoices Register with Real-Time Filtering, Payment Status, and Action Buttons

5.1 On-Screen Elements & Column Guide

- **Invoice Number:** Sequential financial-year serial number (e.g., GC/2026-27/0001).
- **Date & Time:** Exact timestamp when the bill was posted.
- **Customer Name:** Displays walk-in buyer or registered B2B wholesale client.
- **Grand Total (₹):** Net invoice amount including GST.
- **Payment Status:** Green badge (*Paid*) or Orange badge (*Credit / Pending*).
- **Action Column:**
 - **View Eye Icon:** Opens the detailed invoice view.
 - **Thermal Print Icon:** Sends the 80mm slip directly to the counter printer.
 - **A4 Print Icon:** Opens the formal 3-copy standard tax invoice for printing.
 - **PDF Icon:** Downloads a digital PDF copy.

5.2 Finding a Past Invoice

STEP 1: USE FILTER BAR

Enter customer name or invoice number in the search bar. You can also filter by date range (Today, This Week, This Month).

STEP 2: REPRINTING A LOST RECEIPT

Click the **Thermal Print** icon next to the invoice to reprint the customer's receipt instantly.

Chapter 6: Detailed Invoice View & Action Controls

Clicking on any invoice from the register opens the comprehensive Invoice View. This screen displays line-by-line itemizations, tax snapshots, and inventory tracking.

Figure 6.1: Invoice Details Screen showing Line-Item Tax Distributions, Customer Details & Linked Inventory Movements

6.1 Key Information Sections

- **Invoice Meta Header:** Invoice number, financial year code, cashier name, and posting timestamp.
- **Seller & Buyer Card:**
 - Seller: *Gudi Chemicals, Spic, Thenkarai, Coimbatore, Tamil Nadu 641010* (GSTIN: 33AAACG1234D1Z5).
 - Buyer: Customer name, phone, billing address, and state code.
- **Itemized Table:** Lists every chemical product, SKU, batch lot number, quantity, unit price, HSN code, and exact CGST/SGST tax amounts.
- **Payment Record Box:** Displays Cash payment settlement details and cashier audit identity.
- **Linked Stock Movement Audit:** Shows the exact debit movement IDs generated in the inventory ledger.

6.2 Export & Sharing Methods

STEP 1: DOWNLOAD PDF

Click **"Download PDF"** at the top-right to save a copy for emailing to the client.

STEP 2: PRINT TAX DOCUMENT

Click **"Print A4 Tax Invoice"** to generate the commercial transport invoice.

Chapter 7: Standard A4 GST Tax Invoice & Thermal Printing

Gudi Chemicals ERP provides two distinct printing modes designed for different logistics requirements.

For Gudi Chemicals

Authorized Signatory

Figure 7.1: Standard A4 GST Tax Invoice Print Preview with Full HSN Breakdown & Bank Details

7.1 Standard A4 GST Tax Invoice Format

Compliant with Rule 46 of the Indian CGST Rules. Used for B2B commercial dispatches, transport e-way bill verification, and tax input credit (ITC) claims:

- **Official Company Header:** Legal title, trade name, registered Thenkarai address, GSTIN, and contact details.
- **Tax Breakdown Table:** Detailed breakdown showing separate columns for Taxable Value, CGST Rate (9%), CGST Amount, SGST Rate (9%), SGST Amount, and Total Tax.
- **Statutory Declarations:** Legal declarations confirming goods description and authorized signature line.
- **Three-Copy Printing:** Supports printing *Original for Recipient*, *Duplicate for Transporter*, and *Triplicate for Supplier*.

7.2 80mm High-Speed Thermal Receipt Format

Optimized for counter sales:

- Prints in 2 seconds on thermal roll paper (zero ink cost).
- Displays store header, invoice number, items, net total, cash tendered, and change due.

Chapter 8: Chemical Products Master & Dual Pricing

Under **Masters** → **Products**, administrators and inventory managers manage the complete catalog of manufactured cleaning formulations, packaging items, and trading goods.

Figure 8.1: Products Master Catalog with SKU, Category, Dual Pricing (RSP vs WSP), and Stock Levels

8.1 Product Attributes Guide

- **SKU (Stock Keeping Unit):** Unique identifier (e.g. FG-DEGREASE-1L, FG-FLOOR-5L).
- **Barcode:** 12 or 13-digit EAN/UPC code scanned by the hardware barcode scanner.
- **Item Classification:**
 - finished_goods: Bottled cleaning products (Floor cleaner, toilet cleaner, etc.).
 - packaging: Empty HDPE bottles (1L), jerry cans (5L/20L), caps, and induction seals.
 - raw_material: Industrial chemical raw ingredients (Acids, LABSA, surfactants).
- **Dual Pricing Tiers:**
 - **Retail Selling Price (RSP):** Standard counter price for walk-in retail buyers.
 - **Wholesale Selling Price (WSP):** Discounted price for B2B dealers and bulk distributors.
 - **Min Selling Price:** Absolute price floor below which no cashier can sell.
- **Taxation:** HSN Code (e.g. 3402) and statutory GST rate (18.00%).

8.2 How to Add a New Chemical Cleaning Product

STEP 1: CLICK "+ ADD NEW PRODUCT"

Click the blue button at the top-right of the Products screen.

STEP 2: ENTER PRODUCT DETAILS

Enter Name (e.g. *Gudi Pine Floor Cleaner 5L*), SKU, Category, and scan its barcode into the barcode field.

STEP 3: SET COST & SELLING PRICES

Enter manufacturing cost (₹180), Retail Price (₹350), and Wholesale Price (₹290). Click "**Save Product**".

Chapter 9: Multi-Tier Inventory & Stock Ledgers

Under **Inventory** → **Stock Balances**, the system maintains strict inventory controls with batch tracking, moving average cost valuation, and an immutable movement ledger.

Figure 9.1: Real-Time Multi-Tier Inventory Status with Batch Lots, Expiry Dates & Valuation

9.1 Inventory Core Invariants

- **Strict Non-Negative Balance:** The ERP prevents selling stock that does not physically exist. If stock reaches zero, the billing desk alerts the cashier immediately.
- **Batch & Lot Tracking:** Tracks specific manufacturing dates and expiry dates to ensure FEFO (First-Expired-First-Out) picking.
- **Append-Only Movement Ledger:** Every physical addition or deduction writes an unalterable log in stock_movements with timestamp, operator ID, and reference document.

9.2 Recording Physical Stock Adjustments (Wastage / Spillage)

STEP 1: OPEN STOCK ADJUSTMENTS

Navigate to **Inventory** → **Adjustments** → **Create**.

STEP 2: ENTER PRODUCT, QUANTITY & REASON CODE

Select the product, enter the deficit quantity (e.g., 2 bottles damaged), and select reason (*Spillage / Container Damage*).

STEP 3: SUBMIT FOR AUDIT APPROVAL

Stock is atomically adjusted and logged in the audit ledger with supervisor sign-off.

Chapter 10: Chemical Formulas & Bill of Materials (BOM)

Under **Production** → **Formulas**, plant chemists define master chemical recipes specifying raw ingredients, mixing ratios, packaging containers, and standard yields.

Figure 10.1: Chemical Master Formulas (BOM) with Expected Yields and Ingredient Specifications

10.1 Formula Structure & Elements

- **Formula Code & Name:** Identifier and title (e.g. BOM-CLEAN-01 — *Industrial Heavy Degreaser v1*).
- **Base Batch Output:** Standard reference volume (e.g. 1,000 Liters).
- **Expected Yield & Loss Tolerance:** Standard yield percentage (e.g. 98.0%) and allowed evaporation loss (2.0%).
- **Active Ingredients Table:** Exact volume/weight of raw chemicals required per batch (e.g. 850L DM Water, 100L Caustic Soda, 50L Surfactant).
- **Required Packaging:** HDPE bottles, induction seals, and carton packing materials.

10.2 How to Create a New Recipe

STEP 1: CLICK "+ CREATE FORMULA"
Go to Production → Formulas → Create.

STEP 2: DEFINE RECIPE HEADER
Enter formula name, select target finished product, and specify standard batch size (1,000L).

STEP 3: ADD RAW INGREDIENTS

Select each raw chemical, enter quantity per batch, and save the formula. The recipe is now locked and ready for production order scaling!

Chapter 11: Production Orders & Laboratory QC Gates

Under **Production** → **Orders**, plant operators manage the complete chemical manufacturing lifecycle from batch initiation to laboratory testing and finished goods stock finalization.

Figure 11.1: Production Orders Desk showing Batch Lifecycle (Draft → In Production → QC → Finalized)

11.1 The 4-Stage Production Lifecycle

- 1. Draft & Planning:** The order is scheduled. The system dynamically scales required raw ingredients based on planned output volume (e.g. 2.5x for 2,500L) and checks warehouse raw material availability.
- 2. In Production:** Raw chemical stocks are reserved, mixing vats are loaded, and compounding begins.
- 3. Quality Control (QC Gate):** Plant chemists test sample specimens against laboratory specifications:
 - pH Level (e.g. 1.5 – 2.5 for acid descalers, 9.5 – 11.0 for alkaline cleaners).
 - Specific Gravity (e.g. $1.08 \pm 0.02 \text{ g/cm}^3$).
 - Viscosity (Centipoise @ 25°C).
- 4. Finalized:** In a single atomic click, raw chemical stock is deducted, finished bottled goods are added to inventory, and unit production cost is calculated!

11.2 Step-by-Step Batch Finalization

STEP 1: RECORD QC MEASUREMENTS

Click **"Record QC"** on the active batch. Enter observed pH and specific gravity. Mark QC as *Passed*.

STEP 2: FINALIZE PRODUCTION ORDER

Click "**Finalize Batch**". The finished bottled cleaning products are immediately available on the POS billing desk for sale!

Chapter 12: Purchasing & Goods Receipt Notes (GRN)

Under **Purchases** → **Orders**, the purchasing department manages supplier orders, chemical deliveries, and Goods Receipt Notes.

Figure 12.1: Purchase Order Management Desk with Vendor Tracking, Status Badges & GRN Actions

12.1 Purchasing Invariants

The Stock Increment Rule

Stock levels do **not** increase when a Purchase Order is created. Inventory increases **strictly** upon posting a Goods Receipt Note (GRN) after chemical containers physically arrive and are inspected at the depot gate.

12.2 How to Receive Goods via GRN

STEP 1: OPEN APPROVED PURCHASE ORDER

Navigate to Purchases → Orders, find the approved supplier PO, and click **"Create GRN"**.

STEP 2: ENTER DELIVERY & LOT DETAILS

Inspect physical delivery. Enter received quantity, supplier lot number, manufacturing date, and expiry date.

STEP 3: POST GOODS RECEIPT

Click **"Post GRN"**. The raw chemical or packaged product stock increments immediately in warehouse inventory!

Chapter 13: Sales Returns & GST Credit Notes

Under **Sales** → **Returns**, cashiers and customer service staff handle customer returns, container replacements, and credit notes.

Figure 13.1: Sales Returns and Credit Note Management Desk with Original Invoice Linking

13.1 Key Controls & Stock Segregation

- **Mandatory Invoice Verification:** Returns must validate against an original posted invoice number.
- **Saleable vs Damaged Classification:**
 - **Saleable:** Sealed, undamaged bottles return to active sellable inventory.
 - **Damaged / Contaminated:** Diverted to a designated Quarantine area for destruction without polluting sellable stock.
- **GST Credit Note:** Generates a legal credit note adjusting GST tax liability and issuing a cash refund or ledger credit.

13.2 Processing a Return

STEP 1: ENTER ORIGINAL INVOICE NUMBER

Click "+ **New Return**". Type the invoice number (e.g. GC/2026-27/0001). The original items load automatically.

STEP 2: SPECIFY QUANTITY & STOCK CONDITION

Enter returned units and mark condition as *Saleable* or *Damaged*.

STEP 3: ISSUE CREDIT NOTE & REFUND

Click "**Process Return**". The customer is refunded cash, and stock is updated accordingly.

Chapter 14: Sales & Statutory GSTR-1 Tax Analytics

Under the **Reports** menu, accountants and managers access comprehensive commercial reports exportable to Excel and PDF.

Figure 14.1: Comprehensive Sales & Tax Analytics Report with Date Filtering and Summary Cards

14.1 Available Business Reports

- **Daily Sales Register:** Detailed chronological audit of counter billing, cashier collections, and cash breakdown.
- **GSTR-1 Tax Summary:** Statutory outward supplies summary grouped by HSN code and CGST/SGST/IGST tax rates for filing monthly GST returns with the government portal.
- **Stock Valuation Report:** Financial audit valuation of all raw chemicals, intermediates, packaging, and finished cleaning goods based on moving average costs.
- **Customer Receivables Aging:** Tracks outstanding credit balances due from wholesale clients.

14.2 Generating a Monthly Sales Report

STEP 1: SELECT DATE RANGE

Open Reports → Sales. Set Start Date (e.g. 1st of the month) and End Date.

STEP 2: FILTER BY CUSTOMER OR CASHIER (OPTIONAL)

Filter by specific cashier counter or view overall plant totals.

STEP 3: EXPORT TO PDF OR EXCEL

Click **"Export PDF"** to print the executive report for management review.

Chapter 15: System Settings & User Administration

Under **Settings**, system administrators manage company tax credentials, thermal receipt layouts, bank RTGS details, and staff user logins.

Figure 15.1: System Configuration Desk — Company Profile, Tax Settings, Invoice Numbering & Hardware Setup

15.1 Configuration Sections

- **Company Profile:** Business legal name (*Gudi Chemicals*), trade name, address (*Spic, Thenkarai, Coimbatore, Tamil Nadu 641010*), phone, and email.
- **Statutory Tax Settings:** GSTIN (*33AAACG1234D1Z5*), State Code (*33*), and State Name (*Tamil Nadu*).
- **Invoice Sequencing:** Document prefix (*GC*) and active financial year code (*2026-27*).
- **Receipt Print Settings:** Thermal receipt top header message, footer return policy text, and paper width (*80mm*).
- **User Management:** Create new staff accounts, assign roles (*Cashier, Storekeeper, Accountant*), and reset forgotten passwords.

Chapter 16: Keyboard Shortcuts & Technical Support

16.1 POS Cashier Fast-Keys Reference Card

Keyboard Key	Action Performed	Practical Example in Counter Billing
F2 or Ctr1 + K	Focus Product Search	Press to start typing product name without touching the mouse.
F4	Select Customer	Press to switch from Walk-in to a B2B wholesale client.
F7	Toggle Price Tier	Press to switch cart between Retail (RSP) and Wholesale (WSP).
F8 or F9	Open Payment Checkout	Opens the Cash payment dialog to enter tendered cash and see change due.
Enter	Confirm / Complete Checkout	When inside payment modal, press Enter to complete bill and print receipt!
Esc	Dismiss / Clear	Closes any open popup or resets search filters.

16.2 Technical Support & Developer Contact

For system customizations, network printer setups, or technical assistance, contact the developer:
